WHAT WE OFFER...

At Bio-Rite, we recognise that the well being of patients is the principal objective of healthcare providers. We help you to achieve this objective by offering you a total solution to your equipment decontamination requirements. Our flexible approach enables you to create the services best suited to your needs.

Working in partnership with healthcare professionals, Bio-Rite has developed a clear operational strategy to enable Primary Care Trusts, Hospitals, Local Authorities and others to meet their prescribed performance indicators. Our service combines the best practices involved with both manual and mechanical disinfection techniques whilst utilising advances in safe and effective decontamination technology. Overall we deliver a decontamination solution that is flexible, comprehensive and cost effective.
